

Achilles Tendinitis or Rupture

Workout 1 of 4: Full Body Circuit | Beginner | 15 min warm-up + 30 min workout + 15 min abs

LEVEL	TIME	FOR	EQUIPMENT
Beginner	60 minutes	Achilles tendinitis or rupture	Sturdy chair, resistance band, light dumbbells (2-10 lb), mat, step

Workout 1 of 4: Full Body Circuit. Achilles tendons heal with slow, steady loading, not rest alone. This program builds calf strength with slow, controlled calf raises, trains the rest of your body, and avoids jumping, bouncing and quick pushes off your toes. Work at about 4-5 out of 10 effort.

Before you start

- Get your doctor's or physical therapist's OK. After a rupture, follow your surgeon's or boot protocol exactly.
- If you had surgery or wear a boot, follow your doctor's and physical therapist's protocol and timelines. They come first.
- Mild discomfort (3 out of 10 or less) that settles within a day is OK. Sharp pain means stop that move.
- No jumping, bouncing, sprinting or quick pushes off your toes. Calf raises are slow: 3 seconds up, 3 seconds down.

Stop right away and get help if you feel

- Sharp pain in the foot, ankle or shin
- New swelling, bruising or warmth
- Pain that is worse the next morning
- Calf pain or swelling (possible blood clot; call your doctor)
- A sudden snap or feeling of being kicked in the back of the heel (get medical help right away)

This workout is general fitness guidance from Conquer Boxing Fitness & Health and is not medical advice. It does not replace care from your doctor. Always follow your healthcare provider's instructions about exercise, and stop any movement that causes pain.
